

VAN TUAN KIET

JUNIOR JAVA DEVELOPER

CONTACT

- 0976077913
- vankiet27012004@gmail.com
- District 6, HCM City
- kietsocola
- tuankiet

SKILLS

- Core Skills**
OOP, Data Structures & Algorithms, SQL, Problem Solving, Teamwork
- Programming Languages**
Java (primary), Python, JavaScript, SQL, HTML, CSS
- Framework**
Spring Boot, Hibernate, ReactJS, Django
- Development Tools**
Docker, IntelliJ, VS Code, Github Action CI/CD
- English**
Basic communication

AWARD

- 2022, 2023, 2024, 2025:
Received scholarships 5 times
- 3/2025:
2nd place in a Hackathon SGU

CERTIFICATION

2025: TOEIC L&R 595

PROFILE

Enthusiastic **Software Engineer** with hands-on experience in **Java backend development** (Spring Boot, Hibernate) and containerized applications. Skilled in **OOP**, **database design**, and **RESTful APIs** with exposure to **Kafka**, **Docker**, and **microservices architecture**. Seeking a **Junior Java Developer** role to contribute to scalable enterprise solutions and expand expertise in cloud-native development.

EDUCATION

Software Engineering 2022 - 2026
Sai Gon University
GPA: 3.65 / 4.0

WORK EXPERIENCE

Full-Stack Developer - Boostech Company Apr 2025 - Present
Java, Spring boot, ReactJS, PostgreSQL

- Contributed to enterprise ERP system with modules such as Inventory, Project Management, Purchase Order...
- Developed REST APIs using Spring Boot, integrated with Kafka for event-driven messaging.
- Designed and optimized PostgreSQL database schemas to improve data consistency and query performance.
- Containerized services with Docker
- Participated in Agile team environment, conducting code reviews and daily stand-ups.

PROJECT

Adaptive Learning for Moodle July 2025 - Present
Spring, ReactJS, Kong, Github Action, Docker, Python

- Key Contributions:

- Developed Spring Boot backend services and REST APIs for adaptive learning features.
- Managed API routing and authentication via Kong Gateway.
- Containerized services with Docker and implemented CI/CD pipelines using GitHub Actions.
- Collaborated in a microservices-based architecture with cross-functional team.

Social Media Feb 2025 - May 2025
Java, Spring, ReactJS, Hibernate, MySQL

- Key Contributions:

- Implemented posting, commenting, and liking features with real-time WebSocket integration.
- Supported media uploads (images, videos) with cloud storage integration and auto-generated captions using Gemini API.
- Developed a friend/follow system with real-time notification alerts.
